

ARSENAL SHOPPING CENTER

This almost 100 years old building used to be “Arsenal” military factory and is now fully renovated into shopping center and offices with total area of 15 000 m². PIN Architects aimed not to restore but to preserve the old and create new contrast content. Ruukki Forma facade system – wool sandwich panels with special Cor-Ten lamella façade - help to achieve the industrial look for the new parts of the building.

Ruukki's delivery: 2016

- > Sandwich panels in Dark Grey RR23
- > Special Cor-Ten lamella

Partners

- > Owner: Arsenal Center OÜ
