

RIMI SUPERMARKET

The idea of this facade is to bring it to life and create movement and visual effects. Supermarket is located at the crossroads so the diversity of this facade really stands out.

Envelope of the building is based on Ruukki Forma facade system – designed solution for sandwich panels with additional cladding. In this project some modifications were made and regular studs were replaced with special designed and produced fixing clamps. Also stencils were made to simplify its installation. Special lamellas were made of 1.2 mm aluminum and powder painted with two colors.

Ruukki's delivery: 2016

- > Ruukki Forma – 900 m² SP2E Energy 120X-PIR sandwich panels and 9500 m² 1,2 mm aluminum powder painted special lamellas
